

why vegan friendly?

MADE WITHOUT CRUELTY TO ANIMALS

You will be interested to know the slogan "not tested on animals" could often be a misleading statement. Governments around the world demand that many ingredients be tested for safety before they are included in a formula. Products that contain artificial colours (FD & C Colours), fragrances, artificial preservatives or synthetic chemicals are products in question. Many of these ingredients must legally be tested on animals before they are used on the human skin. The product itself may not be tested on animals, unfortunately a major portion of the ingredients are. Organic Formulations proudly has NO artificial colours or harsh synthetic chemicals.

NOT TESTED ON ANIMALS & CONTAIN NO ANIMAL DERIVED INGREDIENTS

Beaver:	Castoreum is from the beavers dried sex glands and is used in perfumes
Beetle:	Carmine is a colour obtained from crushing the bodies of beetles.
Cattle and Chickens:	In most cases Collagen is a by-product from the slaughter of cattle and chickens.
Roosters:	Hyaluronic acid comes from the combs of roosters.
Deer:	Musk is used in perfumes and is taken from the glands of deer.
Mink:	A by-product of slaughtered minks, Mink Oil is used in moisturisers, shampoo and conditioners.
Rabbit and Guinea Pig:	Using products with FD & C Colours encourages animal testing that is required by some governments.
Sheep:	Tallow is used in soap, lipstick and shaving cream and is made by boiling the organs and tissue of sheep.
Whale:	Ambergris is from the intestines of the sperm whale and is used in some perfumes. Spermaceti is from the head of the sperm whale and is used in some cosmetics.

LOOK AT THE FACTS

A note from Papa Tony

Every 3 minutes an animal or plant life is extinct from this planet. That means not one animal but all the animals or plants of that type. If the entire human race just disappeared from earth it would just register as another animal has just gone extinct again.

The Headline would read:

HOMO SAPIENS are believed to be extinct!

Yesterday a fellow ant had said they might have seen one in a remote part of the hill....

If we don't wake up and just see our earth as one life force and understand it's about to go soon and become extinct. We will have no time to regret this. This is not a cheap threat, but a fact of life. Ask the Tasmanian tiger all of them are gone today.

We are at war with the earth and every step we take to win - We lose greatly. We must work with her as she gives us the air, water and land we need. We must respect this planet as a gift from

the gods. Not our given right to abuse it, but our right to protect it as it is the only life force we do borrow from our children.

We are to leave it one day and that's a great reason to abuse it. Why should we care? If you don't understand it, you are not listening to the signs. You are responsible for the destruction of the earth. Why be the cancer to our children's future home? All we can do is leave our child, water to drink, air to breathe and sustainable lands to grow.

Don't wait till someone else does it right for you. You have the power to make a change. Only YOU are able to do it. Our Earth needs your support today. It's easy, just demand the world and its entire people around you to listen and change. The revolution of the Earth has just begun. You are it. Yes, You are IT. I leave it in your good hands. Please let me know what I need to do now?

Thanks Tony
